

Peace of Mind

by showing your location at all times. Spidertracks is an innovative satellite-based tracking system, combining satellite communication and GPS technology into one simple, cost effective and compact solution.

Why spidertracks?

- It's portable, and simple to operate
- Certification not required
- No external antenna
- Zero installation costs
- Spiders can be shared between aircraft - just plug into the power outlet and go
- 100% continuous global coverage by the Iridium satellite network
- Unlike ELT's - get live, full-time tracking location and situation information overlaid onto Google Maps, accessible via the internet from anywhere at any time
- Spidertracks keypad (optional) allows you to send information or emergency messages to mobile phones and e-mail contacts

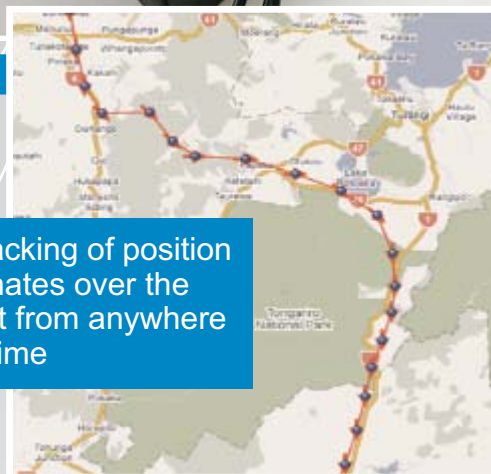

Who uses spidertracks?

- For multiple aircraft operations - knowing the location of aircraft enables you to efficiently direct and manage jobs, which leads to effective planning, pilot safety and cost savings
- Search and rescue operators can accurately mark the position of an injured person or manage a grid search
- Spidertracks is the world's favorite portable satellite tracking solution, with clients in more than 26 countries
- General aviation pilots - *spidertracks gives you peace of mind*

How much does it cost?

- Base unit at \$1,995.00 (through CPD2)
- Monthly subscription service direct with spidertracks.com at \$19.95 a month, plus 10 cents per transmission. (Hourly operating costs as low as \$2.00, based on an interval of a three minute transmit rate.)
